Education

Secondary School Education 09/2018 – 09/2021
Principal Vine High School Lagos, Nigeria
Secondary School Certificate (SSCE/WAEC)

Diploma in Software Engineering 09/2024 – Present
NIIT
Expected Graduation: 2026
Relevant Coursework: Full-Stack Web Development, Java Programming, Spring Boot, RESTful APIs, Database Management (MySQL & MongoDB), Front-End Development (HTML, CSS, JavaScript & React), Mobile Development (React Native), Software Engineering Principles, Object-Oriented Programming, JavaFX & Scene Builder.

Career Objective

Motivated and detail-oriented Software Engineering student pursuing a Diploma in Software Engineering, with hands-on experience developing applications using Java, JavaScript, MySQL, and MongoDB. Currently expanding expertise in full-stack development with React, Spring Boot, HTML, CSS, and React Native. Strong interest in designing scalable backend systems, responsive user interfaces, and efficient database solutions. Seeking an internship or entry-level Full-Stack Software Engineering opportunity to apply technical skills, contribute to real-world projects, and continuously develop as a software professional.

Skills

Programming Languages ● ● ● ● ○
Java, JavaScript

Backend Development ● ● ● ● ○
Java, Spring Boot, RESTful APIs

Databases ● ● ● ● ○
MySQL, MongoDB

Core Competencies ● ● ● ● ○
Problem Solving, Debugging, Database Design, Clean Code, Version Control, Software Development Lifecycle (SDLC)

Frontend Development ● ● ● ● ●
HTML5, CSS3, React.js, Responsive Web Design

Mobile Development ● ● ● ● ○
React Native

Development Tools ● ● ● ● ○
Git, GitHub, Maven, Postman, VS Code, IntelliJ IDEA

Projects

Real Estate Management Platform | Full-Stack Web Application

- Developed a responsive real estate website and admin dashboard for managing property listings and content.
- Implemented property CRUD operations and dynamic data management using **Supabase**.
- Built responsive, user-friendly interfaces using **React.js, JavaScript, HTML5, and CSS3**.
- **Technologies:** React.js, JavaScript, CSS3, Supabase, Git/GitHub

TrueVote Voting Application

JavaFX, MySQL, Scene Builder, Sockets, Threads

Developed a secure voting system with separate admin and user modules.
Implemented real-time communication using sockets, threads, and a custom server for concurrency handling.
Built a multi-scene JavaFX interface with MySQL database integration and result visualization.

Hospital Management

Node.js, MongoDB

Built a hospital management system performing full CRUD operations.
Designed MongoDB schemas and implemented backend logic using Node.js for scalable data handling.

Expense Tracker

Node.js, MongoDB

Developed an expense tracking application to manage incomes and expenses.
Implemented full CRUD functionality and optimized data storage with MongoDB.

Hospital Database

MySQL

Designed and created hospital database tables using MySQL.
Populated and managed data to demonstrate SQL querying and relational design.
